

Expression of Interest Notice for Potential UAS Providers

Without commitment or prejudice.

Thank you for registering your capabilities on the Unmanned Air Systems Capability Development Centre (UAS CDC) Open Supplier Register (OSR). Based on the information submitted onto the OSR you have indicated to us that you have:

- Class 1 (Micro, Mini, Small) UAS capabilities;
- Have a UAS operating capability.

As such, you may be interested in receiving further details of a near term UAS CDC opportunity that needs to be completed by 7th Jan 2015.

MOD Exploitation of Commercial of the Shelf (COTS), Unmanned Air Systems

As COTS UAS become more affordable and capable, Front Line Commands (FLC) and their subordinate units are increasingly looking to utilise COTS UAS for routine tasks such as, but not limited to, aerial survey, photography work and overcoming issues of 'working at height'.

With the potential expansion of the use of COTS UAS for non-operational military tasks, the need for an appropriate and proportionate level of regulation and policy has been identified by the Military Aviation Authority (MAA) and Defence Equipment & Support (DE&S).

The UAS CDC is looking to work with experienced suppliers from the OSR to produce a framework operating manual and procedure that supports the DE&S and MAA wish to regulate COTS UAS in a proportionate manner.

The UAS CDC is looking for commercial UAS operators who have experience of producing CAA accredited operations manuals and who also have experience of writing policy and procedures.

If you would like to receive a Request For Quote (RFQ) please contact the undersigned by 11th Nov 2014.
